

Novel phenomena in oxide two-dimensional electron systems

Thursday, 6 February 2025 11:30 (15 minutes)

I will present results about oxide two-dimensional electron systems (2DES) characterized by functional properties engineered by epitaxy. I will show that 2DES with multiple coexisting order parameters can be designed and realized using this approach.

Presenter: SALLUZZO, marco (CNR-SPIN)

Session Classification: Sessioni parallele

Track Classification: A6.3 Electrons
