

Coherent states detection for light dark matter searches using multi-qubit sensor

Friday, 7 February 2025 09:30 (15 minutes)

The development of superconducting quantum devices has enabled advancements in quantum sensing, particularly for light-dark matter searches. We propose an enhanced detection scheme leveraging multiple qubits to reduce dark-count rates.

Presenter: GOBBO, Marco (UNIMIB)

Session Classification: Workshop tematici

Track Classification: A6.4 Hybrids
