

Pump-driven optical Kerr rotation and hidden quantum entanglement in centrosymmetric bulk WSe₂

Friday, 7 February 2025 11:30 (15 minutes)

We report on the observation of an ultrafast pump-driven Kerr rotation in centrosymmetric bulk WSe₂. We rationalize these findings as result of the hidden entanglement among several quantum degrees of freedom

Presenter: CAPPELLUTI, Emmanuele (Istituto di Struttura della Materia (ISM), CNR, Trieste)
